September 30, 2022

Families in Jasper and Poweshiek Counties,

Marion County Public Health will no longer be providing Child & Adolescent Health services in your county after September 30, 2022. To ensure that your child can easily continue to receive services, your child's health records are being transferred to your new provider, Mid-Iowa Community Action. These services may have included oral health services, such as sealants at your child's school, screenings such as developmental, vision screens, or lead testing.

This does NOT change your Medicaid benefits, Medicaid managed care provider assignment (Amerigroup, Iowa Total Care) or your dental managed care provider assignment (MCNA, Delta Dental of Iowa). This letter does not change the provider for other services such as WIC. You will receive communication from that program directly if the provider will be changing.

Beginning October 1, 2022, Mid-Iowa Community Action will provide services for families with children from birth through the age of 21. These services may include:

- Help locating a doctor or dentist in your area so your family can receive regular and on-going medical and dental care.
- Help obtaining health care coverage.
- Reminders when your child/children need medical and dental checkups.
- Help making health care appointments.
- Help finding community resources.
- Health education and guidance.
- Oral health screenings, fluoride varnish, lead testing and developmental screens

**If you would like more information on child health services, please call Megan Thompson at Mid-Iowa Community Action, 641-752-7162.**

It has been a pleasure to serve you.

Sincerely,

Kim Dorn, Director  
Marion County Public Health Department
